

APPENDIX C

MANDATORY CONTACTS RELATED TO PROJECT

HAMLET OF HALIBURTON
SEWAGE TREATMENT PLANT EXPANSION

REVIEW AGENCY RESPONSE

Date: June 1, 1988

Review Agency: Ministry of Natural Resources, Minden District

Contacted By: Graham Wales

Response: All of the available information regarding fisheries in the Haliburton area had previously been supplied to Caryn Rea of TSH. The primary concerns of the MNR focus on the provision of good quality effluent (within the Provincial Water Quality Objectives or better) to minimize impacts on the dissolved oxygen. The MNR would be concerned with any activities which may lead to erosion and siltation of a watercourse, in particular, the Drag River which is an important habitat and spawning area for various fishes.

Dear Mr. Baker:

**TOWNSHIP OF DYSART ET AL
HALIBURTON SEWAGE TREATMENT PLANT EXPANSION
MOE PROJECT NO. 3-0706**

In response to your request, I am providing the following information in regard to a recommendation from Acres International Limited in their report "Postaudit of Trent-Severn Waterway Operating Procedures in the Haliburton Reservoir Lakes Area". Decreased summertime flows have been proposed for the Waterway's reservoir lakes in the Haliburton area, and this may have some implication to the design or sizing of the sewage treatment plant expansion.

Recommendation 4.4- Operating Policy from the above study is that:

As minimum flow constraints at Norland and Peterborough strongly influence reservoir lake drawdown during the summer, the physical basis for these constraints should be carefully examined. In particular, the potential for reducing the minimum flow requirement at Lakefield, and also at Norland after constructing a weir to raise the level of Shadow Lake, should be examined.

Should other interests ever promote a reduction in summertime flow from the Waterway's reservoir lakes, including Kashagawigamog, you may wish to have minimized any implications to the sewage treatment plant expansion.

Canada

Should you require water level and/or dam setting information for your design we have such data for both Drag Lake and Kashagawigamog/Head Lakes and their dams. Please directly contact Bruce Kitchen or Blaine Trumblay of this office for such information.

Thank you for providing this opportunity to provide comments.

Yours truly,

Attention: R.B. Baker

Dear Sir:

Re: Township of Dysart et al
Haliburton Sewage Treatment Plant Expansion
MOE Project No. 3-0706

Thank you for your letter of May 19th to Mr. Larry Curley regarding the Haliburton Sewage Treatment Plant Expansion. Please be advised that our Peterborough office is responsible for the subject area.

With respect to our area of interest in this project, we are keenly aware of the benefits with respect to the maintenance of and expansion to the subject areas tourism plant and have been working closely with affected tourism operators to implement modification and/or expansion to their operations. In fact, two projects of over one million dollars have been suspended due to the recent findings regarding the existing sewage plants insufficient excess capacity.

I would appreciate your office keeping us informed as to the progress of your study, preliminary findings and where applicable, completion timetables.

Sincerely yours,

Michael A. Walker,
Tourism Industry Consultant.

Dear Sir:

RE: Haliburton Sewage Treatment Plant
Township of Dysart et al
County of Haliburton
Our File: AM 32-02
Project # 3-0706

In reply to your May 19, 1988 letter, it is our opinion that the Terms of Reference for the Environmental Study Report will adequately cover this office's interest.

Thank you for the opportunity to present further concerns.

Yours truly,

T. J. O'Neill
District Officer
