

DYSART TRASH TALK

Let's Talk... **REDUCE**

We are committed to diverting waste and hazards from our landfills and our goal is to make it as easy as possible for you to Reduce, Reuse and Recycle! The 3R's are at the heart of the 'Go Green' global movement!

Reduce:

The first step to reducing your impact on the environment is reducing the amounts of resources you consume and use. Think twice before you buy or use anything. Do you really need it? By reducing your consumption you will also decrease the amount of waste you produce. The opportunities to reduce are nearly endless...

- Be conscious of products and items you purchase and consume everyday! What impact do they have on the environment from beginning to end of lifecycle?
- Choose to buy products with little or no packaging.
- Express your concern about waste reduction directly to manufacturers.
- Opt to bring your own reusable bags for all of your shopping, not just at the grocery store.
- On average one-third (or more) of household garbage can be composted. Why not give backyard composting a try. It'll save precious landfill space and give your garden a boost.

Help protect our environment, save our precious landfill space, and preserve our natural resources by diverting materials and hazards from your landfills. It's easy and it's free!

Talk to one of our knowledgeable landfill attendants to find out how you can help reduce, reuse and recycle today!
